VISION Statement

We aim to provide reliable and qualitative services to the Nigerian energy industry.

MISSION Statement

To be Nigeria's best Engineering, Procurement and Construction Company in the energy sector. We will achieve this by:

- ⦿ Leading the industry in HSE, performance and environmental stewardship
- ⦿ Developing a sustainable and diverse business
- ⦿ Attracting and retaining smart, flexible, and adaptable people
- ⦿ Adapting to changing markets and consistently delivering as sold to our customers

A large-scale photograph of an offshore oil and gas platform, showing a complex network of yellow-painted steel beams and pipes against a blue sky with scattered white clouds. The platform's structure is intricate, with multiple levels and diagonal bracing.

ABOUT INDEXPRO

IndexPro International Services Limited is registered in Nigeria and located our representative offices in Lagos, Port-Harcourt, Rivers State, and Eket, Akwa Ibom State of Nigeria to support Oil and Gas Business in Nigeria and the West African Sub-region, providing maximum local resources deployment and also to ensure accessibility and quick response to EPC needs of most Oil and Gas operators in Nigeria with the most efficient cost and timely delivery. We also have our International office in Houston TX, USA.

We are a company of choice to many major operators and assets owners in Nigeria, with a track record consistently delivering successful projects. IndexPro delivers engineering solutions ranging from conceptual studies to FEED, detailed engineering design and follow-on.

IndexPro Construction and Engineering Teams have robust diversified experience in fabrication and installations on topside and floating vessels. We deliver sea fastening operations on vessels and fabrication and installation aids for deep water wellhead installation programs.

IndexPro delivers a complete range of procurement solutions, We cover both fixed platforms, floating and sub-sea production systems. We have executed successful materials delivery project for our clients on major projects.

IndexPro has extensive offshore operation and maintenance experience, deploying some of the industry's most experience personnel with over 7 years in running the operation of facilities including FPSOs, FSOs, Flow Stations and Offshore Platforms.

A large offshore oil platform with yellow structural elements and white smokestacks is situated in the ocean. A large, bright orange and yellow flame is visible from a flare on the right side of the platform. The sky is blue with some clouds, and the sun is visible on the horizon to the right, creating a warm glow.

Performance Excellence

We are committed to delivering technically challenging mega-projects safety, on time, on budget, to the highest standard of quality.

Fair Return

We provide the highest quality product for the best cost and deliver on what we promise.

Ethics

Mutual respect, integrity, honesty and open communication at all levels are the driving force for how we build relationships with our staff, clients, contractors and suppliers.

Safety

We are driven by an unwavering promise to keep our people and sites "100% Safe."

Sustainability

Environmental protection and social responsibility - the foundations of sustainable development - are integral to our continued

Operational *Philosophy*

SAFETY

We are committed to providing a safe and healthy work place for our employees and partners, ensuring operations are carried out in the manner that protect personnel, the environment and the host communities.

QUALITY

We carefully design every process to yield the highest organizational excellences and greatest client satisfaction. Quality is carefully contained in our culture and it's in the fabric of our organization.

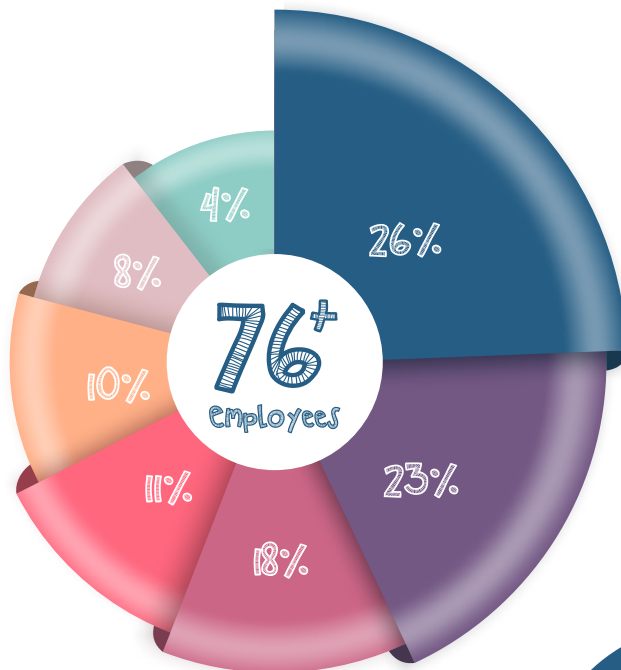

COST EFFECTIVENESS

We carefully design every process to yield the highest organizational excellences and greatest client satisfaction. Quality is carefully contained in our culture and it's in the fabric of our organization.

LOCAL CONTENT DEVELOPMENT

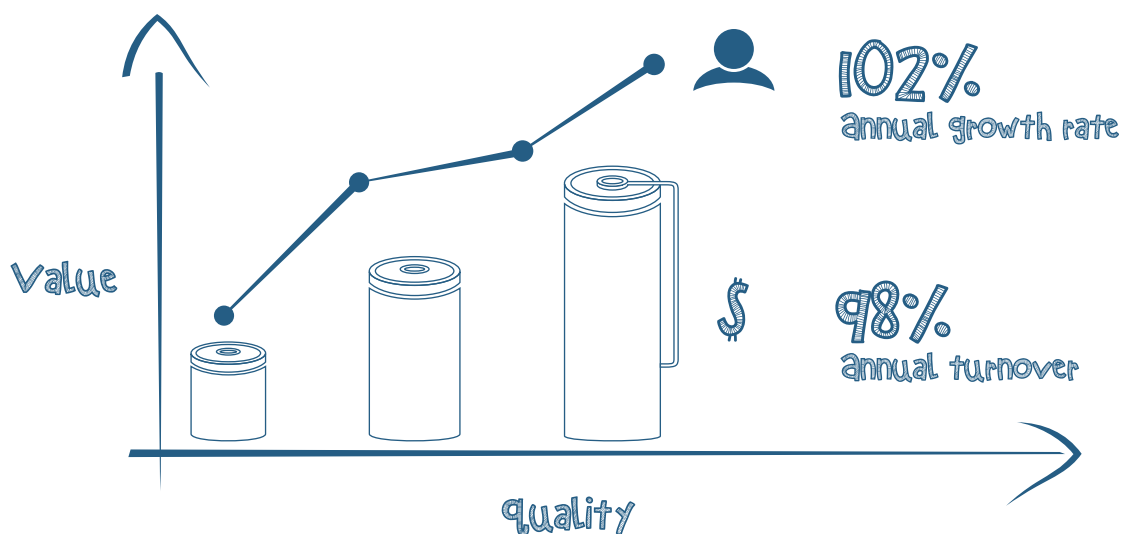

Our collective corporate strategies is to systematically accelerate the transfer of technology, engineering experience, and specialized know-how from our expatriates and foreign technical partners to indigenous nationals.

 **Imoh GEORGE UDOH**
MD/CEO

Management Team

FROM THE MD/CEO

IMOH GEORGE UDOH is a distinguished business leader, engineering professional, and oil and gas industry executive with over 20 years of progressive experience spanning engineering design, project execution, fabrication, construction, installation, business development, and corporate leadership.

As the founder and driving force behind IndexPro Intl Services Limited, established in 2012, he has successfully transformed the company into one of Nigeria's leading indigenous Engineering, Procurement, Construction, and Installation (EPCI) organizations, delivering complex projects across offshore, swamp, and onshore environments within the oil and gas sector. His visionary leadership, strategic business acumen, and technical expertise have enabled the company to secure and execute high-value contracts for major operators and service providers while maintaining a reputation for quality, safety, and operational excellence.

Throughout his career, Imoh has demonstrated exceptional capabilities in business growth and organizational leadership, successfully expanding IndexPro's market presence and increasing company revenue through the

acquisition of strategic contracts and long-term client partnerships. Under his leadership, the company has delivered numerous fabrications, installation, infrastructure, mechanical, piping, and industrial construction projects for clients including Chevron, Shell Nigeria Exploration and Production Company (SNEPCO), ExxonMobil, NAOC, Marine Platforms Limited, Ariosh, Norwegian Ocean Installer, Amazon Energy Limited, Saidel, CEONA, and other leading organizations in the Nigerian energy sector. He has consistently led multidisciplinary teams comprising engineers, project managers, procurement specialists, and technical personnel, ensuring successful project delivery while maintaining strict compliance with international quality, safety, and environmental standards.

One of his most notable achievements is the successful leadership of the Sapele Power Plant RR Trent 60 GT Infrastructure Construction Project, which involved engineering verification, procurement, extensive civil works, foundation construction, turbine installation, structural steel works, control building construction, and supporting infrastructure development. He also spearheaded the execution of the 80 MMSCF Gas Scrubber and Heating Mechanism

MANAGEMENT TEAM

Project, a strategic gas treatment facility designed to supply gas to 240MW GE turbines, where he oversaw detailed multi-disciplinary engineering, procurement, fabrication, equipment sourcing from international manufacturers, gas line integration, commissioning, and project handover. These accomplishments demonstrate his capability to manage large-scale energy infrastructure developments from concept through commissioning.

As Chief Executive Officer, he successfully managed numerous offshore and fabrication projects including the Kwale Flare Down Project, BOOR Engineering Support Project, Boat Landing and Surfer Ladder Fabrication, Stanchions, Spreader Bars and Concrete Mattress Deployment Projects, Deck Strengthening Projects onboard offshore vessels, and the Installation of an Automobile Assembly Plant for MIMSHAC. These projects involved engineering design reviews, fabrication management, procurement coordination, welding and inspection activities, sea-fastening operations, offshore support structures, load-out activities, installation support, commissioning, and documentation management. His ability to coordinate resources, manage project risks, oversee technical execution, and deliver projects within aggressive timelines has earned him recognition as a results-oriented industry leader.

Before establishing IndexPro, Imoh built a strong technical foundation through engineering roles with CresTech Engineering, Flowline Energy Services, and ExxonMobil Nigeria, where he contributed to major projects including the EGP 3B Chevron Project, USAN FPSO Detailed Design Project, and various offshore

platform engineering assignments. His responsibilities covered piping design, equipment layout development, process and instrumentation diagram preparation, routing studies, piping support design, offshore field engineering, drawing updates, and technical documentation. These experiences provided him with comprehensive exposure to engineering standards, offshore operations, and project execution methodologies that continue to influence his leadership approach today.

In addition to his executive leadership achievements, Imoh possesses extensive expertise in business development, client relationship management, supply chain optimization, financial planning, risk management, vendor negotiations, regulatory compliance, and organizational growth. He has successfully built sustainable relationships with key stakeholders across the energy value chain while implementing systems that improve project performance, safety culture, operational efficiency, and profitability. His commitment to excellence, innovation, people development, and strategic growth has positioned both himself and IndexPro as trusted contributors to Nigeria's industrial and energy infrastructure development.

A respected executive with a strong blend of technical knowledge and commercial leadership, IMOGEORGE UDOH continues to play a pivotal role in advancing indigenous participation in the oil and gas industry. His career is characterized by a proven track record of delivering complex engineering and construction projects, building successful organizations, leading high performing teams, and creating lasting value for clients, stakeholders, and the broader energy sector.

 **Uwemedimo NKANANG**
(B.ENG, MNSE, COREN) 
E.D. Projects & Engineering

UWEMEDIMO SUNDAY NKANANG is a seasoned Project Management and Engineering professional with over two decades of extensive experience spanning project management, construction management, mechanical and piping engineering, offshore and onshore fabrication, marine operations, procurement, installation support, and project execution within the oil and gas, energy, petrochemical, and infrastructure sectors. He has built a distinguished career delivering complex, high-value projects for leading international and indigenous organizations, including ExxonMobil, Chevron, TotalEnergies, Shell Nigeria Exploration & Production Company (SNEPCO), First E&P, Baker Hughes, Azule Energy, NAOC, Marine Platforms Limited, Technip Group, and Dangote Refinery & Petrochemical Company.

Throughout his career, Uwemedimo has successfully managed and executed numerous strategic projects ranging from offshore field developments, subsea infrastructure support, gas plant revamps, refinery construction support, vessel mobilization, piping systems fabrication, structural installations, and brownfield modifications to large-scale engineering and construction activities. He played significant roles in landmark projects such as the Dangote Refinery & Petrochemical Project, where he contributed to the fabrication and installation support for mooring pile and chain installations, CALM Buoy systems, PLEM installations, pig launchers and receivers, subsea pipeline support structures, and offshore mobilization activities. His involvement in the Anyala and

Management Team

Madu Field Development SURF Project included the construction and fabrication of critical offshore equipment such as spreader bars, diving LARS grillages, deployment chutes, work platforms, and sea-fastening systems that supported successful offshore operations.

As a Project Manager and Construction Manager at IndexPro International Services Limited, he has demonstrated exceptional leadership capabilities in overseeing multi-disciplinary engineering teams, coordinating fabrication and construction activities, managing project risks, controlling costs, and ensuring the successful delivery of projects in line with client expectations, international standards, and HSE requirements. His expertise extends across the entire project life-cycle, from project conceptualization and planning through engineering design, procurement, fabrication, installation, commissioning, and project closeout. He is highly experienced in developing Project Execution Plans (PEPs), transportation and installation procedures, lifting plans, fabrication methodologies, construction schedules, and resource optimization strategies that consistently drive project success.

His technical accomplishments also include major contributions to several ExxonMobil projects such as the Ubit PP Restoration Project, BRT Loading Arm MOV Replacement Project, OCIP II Projects, Asabo MP Fabrication Works, Ubit GP Piping Fabrication, Iyak SB Platform Expansion, and Etim Life Extension Projects. In these positions, he successfully delivered engineering reviews, technical evaluations, fabrication coordination, piping design, structural installation supervision, field verification studies, and offshore installation support, ensuring operational integrity and production efficiency across critical assets.

Earlier in his career, Uwemedimo served as a Piping Designer and Design Engineer with leading engineering organizations including Technip Group and GTA Engineering, contributing to prestigious projects such as the Egina FPSO Development, Ofon Phase II Project, EGP3B Project, Asabo Additional Gas Generator Project, Iyak SB Slot Addition Project, and National Integrated Power Project (NIPP). His involvement in these projects covered engineering design, 3D modeling, piping layout development, material take-off generation, equipment design, substation engineering, and project documentation, laying a strong technical foundation that continues to support his effectiveness as a project leader today.

He is a registered member of the Council for the Regulation of Engineering in Nigeria (COREN), the Nigerian Society of Engineers (NSE), the Project Management Institute (PMI), and the Nigerian Piping Engineers Association. Uwemedimo combines strong technical expertise with excellent leadership, stakeholder management, and business delivery capabilities. His track record reflects consistent success in delivering challenging projects safely, on time, within budget, and to the highest quality standards. Recognized for his strategic thinking, problem-solving abilities, and commitment to operational excellence, he has established himself as a respected engineering and project management professional whose contributions have supported some of Nigeria's most significant oil and gas, marine, and industrial development projects.

 **Samuel UTIP** (JP, MNIM)
Accountant/Financial Controller

SAMUEL UTIP EZEKIEL, JP, MNIM is an accomplished accounting and financial management professional with over 15 years of experience in financial administration, accounting operations, records management, budgeting support, cost control, and corporate financial reporting. Throughout his career, he has demonstrated a strong commitment to accuracy, accountability, and operational efficiency, providing financial stewardship that supports business growth, compliance, and informed decision-making. His expertise spans financial record management, payment administration, accounting controls, reporting, and business support services across multiple sectors.

As an Accountant at IndexPro Int'l Services Limited, a position he has held since 2016, Samuel has played a vital role in strengthening the company's financial management systems and supporting its growth within Nigeria's engineering, procurement, construction, fabrication, and oil and gas services industry. His responsibilities include maintaining accurate accounting records, ensuring the integrity of financial books, implementing efficient payment procedures, preparing financial reports, and providing management with reliable financial information for strategic decision-making. Through his diligence and

attention to detail, he has contributed significantly to the organization's financial stability, transparency, and operational effectiveness.

During his tenure at IndexPro Int'l Services Limited, Samuel has been instrumental in ensuring that financial transactions are properly documented, monitored, and aligned with established accounting standards. He has consistently provided financial advice aimed at improving cost efficiency and resource utilization, helping management optimize expenditure and enhance overall business performance. His ability to maintain accurate and up-to-date financial records has provided critical support for project execution, corporate planning, and management reporting within a dynamic business environment.

Prior to joining IndexPro, he served as an Accounts Clerk at Esago Foundation Services, where he was responsible for maintaining financial records and supporting core accounting functions. This role provided him with a strong foundation in accounting processes, bookkeeping, records management, and financial administration, enabling him to develop the practical skills that have defined his professional success.

In addition to his corporate experience, Samuel served as a Financial Accounting Teacher during his National Youth Service Corps (NYSC) assignment at Born To Reign International Secondary School, where he taught Financial Accounting and prepared students for internal and external examinations. This experience enhanced his communication, analytical, and mentoring abilities while demonstrating his capacity to simplify complex financial concepts and contribute to knowledge development. A graduate of the University of Port Harcourt with a Bachelor's Degree in Accounting and a member of the Nigerian Institute of Management (Chartered), Samuel combines strong academic knowledge with practical industry experience. He is recognized for his analytical mindset, professionalism, integrity, and results-oriented approach to work. His proficiency in financial record keeping, reporting, cost management, and business support, coupled with excellent interpersonal and communication skills, has enabled him to contribute effectively to organizational success and operational excellence.

Throughout his career, SAMUEL UTIP EZEKIEL has consistently demonstrated reliability, accountability, and dedication to excellence in financial management. His proven ability to support corporate objectives through effective accounting practices, financial controls, and sound administrative processes continues to make him a valuable asset to any organization seeking strong financial oversight and sustainable business growth.

Onyeche, INNOCENT

HR, Admin & Operations

Amaefule, Innocent Onyeche is a highly accomplished Human Resources, Administration, & Operations Management professional with over 15 years of progressive experience driving organizational growth, workforce management, operational excellence, and business support services across diverse industries.

With a strong background in human capital development, corporate administration, site operations, logistics coordination, procurement support, compliance management, and stakeholder engagement, he has built a reputation for delivering efficient people-focused strategies that enhance productivity, strengthen organizational performance, and support sustainable business growth.

Throughout his career, Innocent has successfully contributed to the development and implementation of robust human resource and administrative systems that support workforce planning, talent acquisition, employee engagement, performance management, compliance, and operational effectiveness. As the **Human Resources Lead at Indexpro International Services Limited**, he oversees strategic HR initiatives aligned with corporate objectives, ensuring the effective management of the entire employee life-cycle, from recruitment and onboarding to performance evaluation, development, retention, and separation. His leadership has been instrumental in fostering a productive, safety-conscious, and high-performing work environment that supports the company's continued growth and operational success.

Management Team

IndexPro

An E P C I Company

Prior to his current role, he served as Admin/HR Officer at **Indexpro International Services Limited**, where he played a key role in establishing and strengthening the company's HR and administrative framework. During this period, he successfully supported the recruitment, placement, performance monitoring, and administration of a workforce of over 200 employees while coordinating payroll support activities, personnel audits, statutory compliance, employee welfare programs, facility management, fleet administration, and corporate reporting. His contributions significantly improved organizational efficiency, employee management processes, and administrative controls, positioning the company for sustained operational growth.

His professional achievements also extend to operations management, where he served as **Manager, Operations at Petromax Integrated Services Limited**. In this capacity, he coordinated site operations, manpower deployment, logistics management, inventory control, contractor interfaces, and HSE compliance activities. Through effective resource planning, operational monitoring, and stakeholder coordination, he contributed to the successful execution of field operations while ensuring adherence to safety, quality, and performance standards.

Earlier in his career, as **Administrative/Commercial Officer at Selop Infinite Company Limited**, Innocent provided critical support for procurement, commercial administration, logistics coordination, vendor management, inventory control, employee welfare, and community relations initiatives. He successfully coordinated daily site operations, supported project delivery activities, facilitated supplier engagements, and implemented documentation and reporting systems that enhanced accountability, cost control, and operational transparency. Notably, he also championed corporate social responsibility initiatives and stakeholder engagement programs that strengthened relationships with host communities and external partners.

A holder of a **Master of Science (M.Sc.) in Corporate Finance** and a **Bachelor of Science (B.Sc.) in Banking and Finance**, Innocent combines strong financial knowledge with extensive practical experience in human resource management and business operations. His expertise is further strengthened by his certification in **ISO 9001:2015 Quality Management System Internal Auditing**, reflecting his commitment to quality, compliance, continuous improvement, and organizational excellence.

Over the years, Innocent has distinguished himself through his ability to align workforce strategies with business goals, implement effective administrative systems, enhance compliance standards, manage organizational resources efficiently, and foster productive employee relationships. Recognized for his leadership, professionalism, integrity, problem-solving abilities, and strong stakeholder management skills, he continues to play a vital role in supporting business growth, operational efficiency, and organizational development. His track record of delivering value through people, processes, and performance makes him a highly respected professional and a key contributor to the success of any organization.

Chika AUGUSTUS

QA/QC Lead / Quality Manager

wokearu Chika Augustus is an experienced QA/QC Lead, Quality Management Professional, and Project Engineer with over 10 years of expertise in quality assurance and quality control, welding inspection, non-destructive testing (NDT), pipeline construction, fabrication, and oil and gas project execution. He currently serves as the QA/QC Lead at IndexPro International Services Limited, where he provides leadership in quality management systems, fabrication quality assurance, welding inspection, project compliance, and client quality interface for major onshore and offshore projects.

Throughout his career, he has successfully delivered quality assurance and quality control services on major projects for leading organizations including NNPC, Indorama, Gaslink, TotalEnergies, Chevron, SNEPCO, Dangote Group, NAOC, Marine Platforms

ManagementTeam

IndexPro

An E P C I Company

Limited, and Amazon Energy. He has played key roles in several high-profile projects, including the OB3 Gas Pipeline River Niger HDD Crossing Project, Indorama Gas Pipeline and Valve Station Projects, VI-Lekki Gas Pipeline Project, Ikike Field Development Project, Kwale Gas Flare-down Project, Akiri Gas Recovery Pipeline Project, Dangote Pig Launcher and Receiver Fabrication Project, Bonga Light Well Intervention Project, Agbami Phase 3 Project, and Aje Field Development Project. His responsibilities have included quality management system implementation, welding inspection, hydrotesting, NDT coordination, quality audits, commissioning support, contractor quality oversight, and client liaison.

A strong advocate of continuous improvement and operational excellence, Chika has contributed significantly to the successful implementation, certification, and maintenance of ISO 9001:2015 Quality Management Systems, helping organizations achieve international quality standards and deliver projects safely, efficiently, and in compliance with client and regulatory requirements. His technical expertise, leadership capabilities, and commitment to quality have established him as a trusted professional within Nigeria's oil and gas, pipeline, fabrication, and industrial sectors.

With certifications in ASNT Level II NDT Inspection, Internal Auditing, Welding Inspection, and Quality Management, alongside extensive field and project experience, he continues to support the successful delivery of critical energy infrastructure and engineering projects while maintaining the highest standards of quality, safety, and operational performance.

 **Enobong, AKPANUDO**
QHSE, Operations Lead

E NOBONG AKPANUDO is a dynamic QHSE professional, Project Operations Lead, and HSE Advisor with extensive experience in quality assurance and quality control, process safety management, occupational health and safety, project operations, welding inspection, offshore vessel mobilization, and oil and gas project execution. Currently serving as Project Operations Lead at Indexpro International Services Limited since May 2026, and having previously served as HSE Advisor from November 2025, he has demonstrated strong leadership in driving operational excellence, safety compliance, workforce coordination, and quality assurance across complex engineering, fabrication, and installation projects.

Management Team

Throughout his career, Enobong has contributed to major projects and operations for leading organizations including SNEPCO, Baker Hughes, NCDMB, Shell, SPIE, NAOC, Marine Platforms Limited, Bell Oil and Gas, and Indexpro International Services Limited. His expertise spans QHSE management, process safety, risk assessment, welding quality control, contractor safety supervision, offshore logistics, vessel mobilization, fabrication support, and project coordination.

He has played key roles in notable projects including the Kwale Flare Down Project for NAOC, Fabrication of 14" Seawater Caisson Vent Modification for EHRA FPSO, and the mobilization and demobilization of offshore vessels such as African Vision, African Inspiration, and Maersk Inventor. In these projects, he provided HSE supervision, quality assurance oversight, lifting operations support, fabrication inspections, risk management, and operational coordination, contributing to safe and successful project delivery.

A certified professional in NEBOSH Process Safety Management, PRINCE2 Project Management, BOSIET-OPITO, First Aid/CPR, ISO Management Systems Awareness, Procurement and Contract Management, Subsea Structures Installation and Hydrodynamics Analysis (ORCAFLEX), and QA/QC in Welding Practices, Enobong combines technical competence with practical field experience to deliver high standards of safety, quality, and operational performance.

● **Multi-discipline Engineering Solutions to cover your asset life-cycle**

INDEXPRO brings vast process plants experience to your project. Our process engineers and project managers average more than 20 years in the Oil and Gas process industry, with extensive knowledge of all project execution.

Our designs are backed by a strong support team, proven work processes and cutting edge Integrated Engineering Design tools. From small brownfield modification through conventional offshore Greenfield project to sub-sea field development, INDEXPRO capabilities extend through the asset life-cycle.

● **Conceptual Engineering**

Our team focuses on functional requirements, systematic engineering and decision quality process during feasibility study by studying all project stakeholder perspectives and reviewing economic return.

● **Front End Engineering Design**

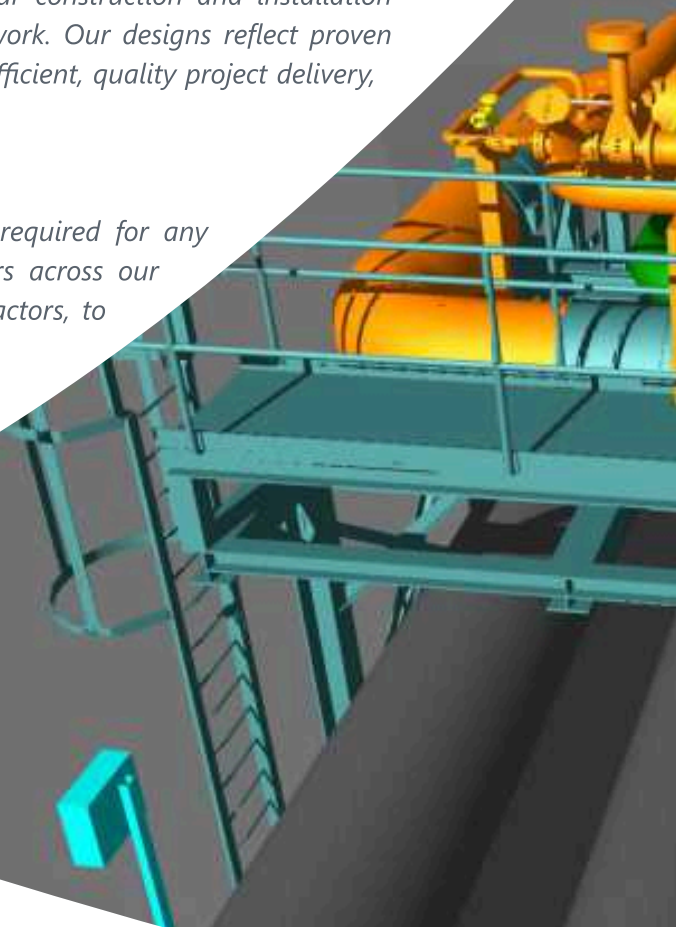

Our FEED solutions provide certainty of delivery and a high level of reliability. Our cost estimates are based on legacy and market data from our construction and installation experience as well as from procurement and vendor network. Our designs reflect proven construction and installation practices to ensure reliable, efficient, quality project delivery, lower costs, and faster FEEDs.

● **Detail Design**

We are experts at carrying out modeling and analysis required for any installation methodology. We work closely with engineers across our marine and fabrication teams, as well as specialist contractors, to enable fully engineered installation solutions.

● **Installation Engineering**

We draw on several years of experience & knowledge of constructability and best practices across multiple-disciplined design teams.

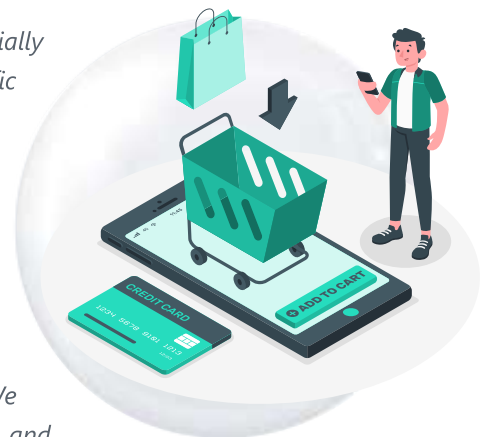

Engineering Capabilities

- ▶ *Project Management & Administration*
- ▶ *Conceptual Studies*
- ▶ *Front End Engineering Design (FEED)*
- ▶ *Detailed Engineering Design*
- ▶ *Construction Management*
- ▶ *Installation Engineering*
- ▶ *Integrity Management*
- ▶ *Procurement and Construction Support*
- ▶ *Hookup and Commissioning Assistance*

- INDEXPRO delivers proven procurement strategies and solutions to substantially reduce supply chain costs and deliver quality materials that meet client's specific requirements on schedule. We have longstanding global alliance and rich network of Original Equipment Manufacturers (OEM's), authorized distributors of oilfield equipment, global buying houses, reputable third party quality inspectors and global freight forwarders. Our team has deep experience and understanding of local and international sourcing market and supply chain management.

With a track record of several successful project materials delivery for our clients, INDEXPRO is a leader in providing turnkey procurement solutions. We carefully select vendors and suppliers who share our passion for excellence and strive to add value to our projects with a joint focus on quality, schedule, and price.

Global Strategic Sourcing

Through rich networks and global alliances, INDEXPRO's teams of qualified buyers are able to source any material required by our clients from the right and trusted sources. We carefully select vendors and suppliers who share our passion for excellence and add value to our projects with a combination of right quality, optimal schedule, and best price.

Global Inspection and Expediting Services

Our inspectors and expeditors work closely with suppliers to verify equipment and materials conform to clients' specifications and quality standards. INDEXPRO's inspectors witness key activities during equipment manufacturing to verify conformance to specifications and our expediting activities cover the entire process. Our Inspection Services team ensures quality with effective inspection task planning, efficient testing and reporting methods.

We organize, plan, execute, control and verify the quality of the work in accordance with clients requirements and INDEXPRO Quality Management System while continuously taking action to identify, report, correct and prevent nonconformity.

Warehousing and Logistics Optimization

Procurement Capabilities

- ▶ *Global Strategic Sourcing*
- ▶ *Materials Management*
- ▶ *Inspection Services (QA & QC)*
- ▶ *Supply Chain and Subcontract Management*
- ▶ *Warehousing and Logistics Optimization*

- INDEXPRO has the capabilities to deliver excellent construction and installation management for our clients, enhancing the quality and worth of projects. Our services covers complete construction & installation works for Onshore and Offshore projects, production units, turn-key installations from design, Subsea construction etc. Knowing fully well that the end product in construction and installation depends on the construction practices, quality of materials, safety and quality control in the construction process.
- The construction services offered by INDEXPRO are directed at optimizing the aptness, quality and worth of construction projects. Our construction management team focuses on providing principal practices for construction methods, QHSE, project management, subcontractor management and other issues affecting construction projects.

Fabrication

The INDEXPRO Port Harcourt Fabrication Base is located at KM 21 ph/Aba Express Way (Beside Stanbic IBTC Bank Iriebe) Port Harcourt, Rivers State, Nigeria. It is 100% Nigerian owned company and has an approximate land area of 8 hectares facing the major Port Harcourt Aba Expressway and provides access to all the major airports and Onne Seaport.

We have the capabilities to deliver 10,000 – 20,000 metric Tons of fabricated products per year with our state-of-the-art fabrication facilities. Our fabrication facility is one of the most competitive in Africa with a 15,600 square meter of three major covered workshops, two (2) of which has the capacity to handle up to 28 meter width and 16 meter heights fully assembled structures.

Our facility is equipped with advanced production management systems, manufacturing technology and construction equipment making INDEXPRO the ideal construction service provider in the industry.

To complement our fabrication capabilities the facility also offers services such as shop drawings and detailing.

Our project management teams are skilled in leading and completing projects on time, within budget in accordance with the client's requirement in order to maximize customer satisfaction.

Construction Capabilities

- ▶ Offshore structures (inclusive of Central Processing Platforms, Wellhead Platforms, Compression Modules, etc.)
- ▶ Offshore revamp and upgrades
- ▶ Offshore and Onshore maintenance programs
- ▶ Process piping systems
- ▶ Pressure vessels
- ▶ Onshore modules
- ▶ Complex modular structures
- ▶ FPSO components
- ▶ Subsea structures, manifolds, riser-bases
- ▶ Subsea spools and tie-in systems
- ▶ Complete subsea field installations, hook-up, pre-commissioning and commissioning
- ▶ Buoys

- INDEXPRO delivers fully integrated solutions for the offshore installation of oil and gas production facilities. We have extensive experience and expertise in hook-up and commissioning, offshore transportation and installation (T&I) of jackets and topsides, seabed intervention, subsea construction and subsea installation of umbilicals, risers and flowlines (SURF). In addition, we offer services to floating structures such as floating production, storage and offloading units (FPSOs) including mooring installation.

Our focus is on field development, brownfield revamp/modification of fixed platforms, associated pipelines and deepwater floating systems. Our installation activities bring together a range of fields of expertise including collaboration with partners who are global leaders in offshore installation to create comprehensive, cost-effective solutions that are specifically tailored to meet your needs. Our global partnerships complement and extend INDEXPRO local capacity and capability and enable us to offer fully integrated solutions supported by in-house engineering, procurement, dedicated project management capabilities and fleets of various types of construction/installation vessels.

Hook-Up Services

Our Hook-up services comprise the installation of modules on new platforms and the refurbishment of topsides of existing fixed and floating production facilities.

Offshore T&I

In strategic alliance with foreign technical partners, INDEXPRO provides fully integrated transport and installation (T&I) solutions for fixed offshore oil and gas production structures in shallow waters. Our activities include seabed preparation, transport to the field including load-out from construction sites, lifting and launching jackets, installation of topsides and associated pipelines.

Integrated Subsea Construction & Installation

We offer integrated services for subsea infield installation of spools, subsea structures, floating hoses, pipelines, power cables, and subsea infrastructure pipeline end manifolds (PLEM). We also offer inspection, repair and maintenance, and light construction work with divers and remotely operated vehicles (ROV's). Further, we can provide FPSO, mooring buoy and mooring system installation, platform and subsea structure decommissioning.

SURF

We provide full range subsea services and hold strong EPCI (Engineering, Procurement, Construction, and Installation) expertise within the SURF (Subsea structures, Umbilicals, Risers, Flowlines) segment. Leveraging partners' high-end construction support vessels, we safely execute projects, which connect seabed wellhead infrastructures to surface facilities such as platforms and floating production systems.

Installation Capabilities

Our integrated installation solutions allow us to streamline processes and reduce interfaces, thereby savings costs and time, and reducing risks. We provide in-house engineering, procurement, project management as well as the following:

- ▶ *Hook-Up Services*
- ▶ *Offshore T&I*
- ▶ *Integrated Subsea Construction & Installation*
- ▶ *SURF*

- Our team of IndexPro certified inspectors ensures the highest standards on all jobs. As a total integrated solutions provider, we offer comprehensive corrosion management solutions for onshore and offshore platforms, rigs and other oil and gas asset. We offer customized and comprehensive auditing, inspection, planning, execution and project management services. The company offers total corrosion management solutions for the marine and offshore industry.

Corrosion Capabilities

- ▶ Corrosion Audits / Inspections
- ▶ Surface Preparation and Painting
- ▶ Scaffolding Services
- ▶ Rope Access Services
- ▶ Provision of Skilled Personnel
- ▶ Supply of Equipment such as UHP Units, Air Compressors, Airless Spray Pumps, Etc.

*We offer Comprehensive Corrosion
Management Solutions for onshore
and offshore Platforms/Rigs*
